SHAPESCAPER™ steel landscape edging

Manufactured in Australia with BlueScope® Steel

Lengths are supplied complete with connector plates, stakes and screws. Pre-drilled holes make assembly and alignment easy. SHAPESCAPER™ landscape edging is a modular steel landscaping system available in five profile heights at 100mm, 150mm, 250mm, 390mm and 590mm. All lengths are 2400mm long and can be shaped on site into angled bends or flowing curves. SHAPESCAPER™ steel landscape edging is made using either Redcor® weathering steel or GALVABOND® galvanized steel from BlueScope® steel. Redcor® steel is equivalent in specification to “corten” steel.
